

## MODEL: PTF115

### HIGH VISCOSITY & SANITARY APPLICATIONS

- 0.25% OR 0.5% ACCURACY
- ZERO AND SPAN ADJUSTMENTS
- TEMPERATURE COMPENSATION
- ST. STEEL HOUSING & WETTED PARTS
- RANGES FROM 50 in.H2O UP TO 8000 PSI
- LONG SERVICE LIFE AND GREAT STABILITY
- EXCELLENT ALTERNATING LOAD RESISTANCE
- HASTELLOY-C OR TEFLON COATED FLUSH DIAPHRAGM (OPTION)
- LOCAL INDICATOR WITHOUT OR WITH TWO OPTO CONTACTS (OPTION)

### INTRODUCTION

Indumart *PTF115* Flush Diaphragm Pressure Transmitters are very accurate and reliable instruments which convert pressure inputs to current or voltage signals.

Flush diaphragm transmitters are suitable for the measurement of slurry, sludge, or high viscosity media. By avoiding dead area crystallization of the solid particles, they ensure trouble-free pressure measurement. These pressure transmitters have been carefully designed to cover the majority of industrial applications, such as, water and wastewater treatment, pulp and paper stock measurement, level measurements, chemical and petrochemical processes, food and pharmaceutical industries, and many other process control operations.

The case and wetted parts of the *PTF115* transmitters comprise stainless steel and are thus resistant to chemically aggressive media. Optionally, the flush diaphragm may be made of Hastelloy-C or teflon coated stainless steel. The pressure connection and the measuring element of these precision instruments are welded together, making the measuring system particularly resistant to mechanical shocks or vibrations.

The *PTF115* transmitters are available in various ranges, as low as 50 in.H2O (0.1 bar) to the maximum of 8000 psi. The zero and span of the *PTF115* can be adjusted by the user to accommodate any pressure offset or the exact range setting.

Optionally the *PTF115* with current output can be combined with the DIS100 indicator (IP65). This combination can have no contact or two opto contacts.

### SPECIFICATIONS

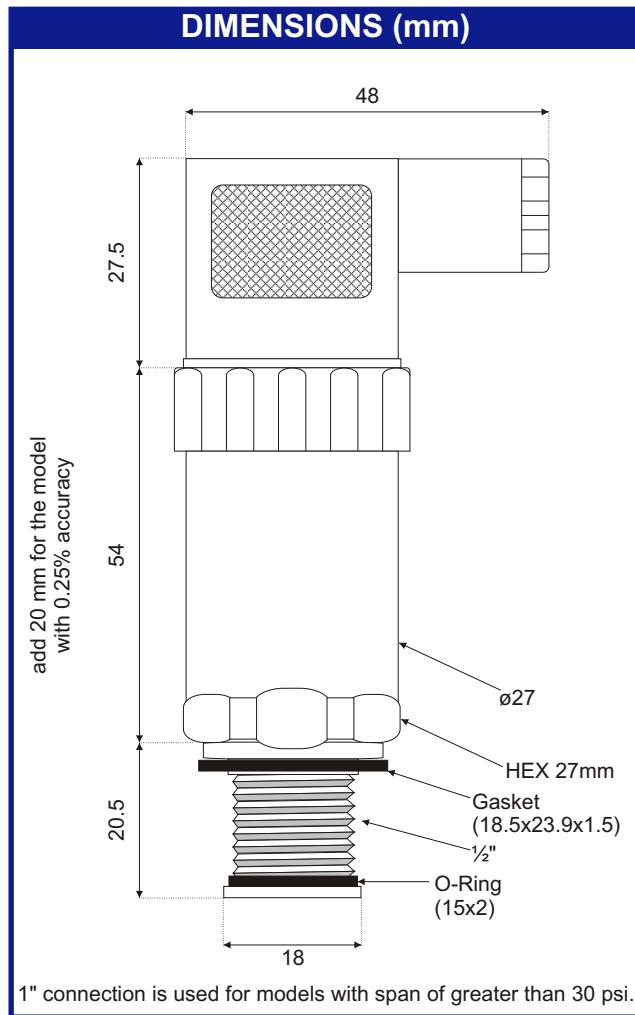

<b>Accuracy</b>	0.5% of span; 0.25% (option)
<b>Housing</b>	AISI 304
<b>Process Connection</b>	AISI 316; 1" for up to 30 psi, ½" for 50 to 8000 psi span
<b>Wetted Parts</b>	AISI 316 (standard) Hastelloy C flush diaphragm, Teflon coated 316 st. steel
<b>Sensor Element</b>	≤300 psi piezoresistive; ≥300 psi thin film
<b>Measuring Range</b>	0...50 in. H2O to 0...8000 psi
<b>Pressure Type</b>	Absolute, vacuum, compound and positive pressures
<b>Transmitting Liquid</b>	Silicon oil, fluorocarbon oil for O2 service
<b>Adjustability</b>	Zero and span adjustments ±5% of the full scale
<b>Response Time</b>	≤1 ms (10...90% of scale)
<b>Output Signals</b>	4-20 mA, 0-20 mA, 0-5 V, 0-10 V, and 0-100 mV
<b>Power Supply (V<sub>s</sub>)</b>	10...30 VDC
<b>Electric Connection</b>	14...30 VDC (for 0-10 V output)
<b>Electrical Protection</b>	Plug with junction box
<b>Temp. Compensation</b>	Reverse polarity, over-voltage and short circuit protections
<b>Temp. Coefficient</b>	0.02% / k
<b>Medium Temperature</b>	-30...100°C
<b>Ambient Temperature</b>	-20...80°C
<b>Environ. Protection</b>	IP65
<b>Vibration Resistance</b>	15 g (15...2000 Hz)
<b>Shock Resistance</b>	1000 g, 1 ms
<b>Weight</b>	0.2 kg, 0.3 kg for 0.25% acc.

Range	Over Range	Burst Pressure
30...0 in.Hg (vac.)	70 psi	70 psi
30"...0...30 psig	250 psi	250 psi
30"...0...60 psig	500 psi	500 psi

0...500 psig	1100 psi	5800 psi
0...600 psig	1100 psi	5800 psi
0...750 psig	1100 psi	5800 psi
0...1000 psig	1750 psi	8000 psi
0...1500 psig	2900 psi	11,600 psi
0...2000 psig	4600 psi	14,500 psi
0...3000 psig	4600 psi	14,500 psi
0...5000 psig	11,600 psi	25,000 psi
0...8000 psig	17,400 psi	35,000 psi

- Over range pressure: causing no permanent change in specifications; zero and span may need readjustments.  
- Burst pressure: leading to permanent, non-adjustable changes in specifications or destruction of the transmitter.

Output	Load Resistance	$U_{\text{supply}}$
4 - 20 mA	$(U_{\text{supply}} - 10V) / 0.2 A$	10 - 30 VDC
0 - 5 VDC	$\geq 5.0 \text{ k}\Omega$	10 - 30 VDC
0 - 10 VDC	$\geq 10.0 \text{ k}\Omega$	14 - 30 VDC
0 - 100 mVDC	$\geq 1000 \text{ k}\Omega$	10 - 30 VDC
0 - 20 mA	$(U_{\text{supply}} - 10V) / 0.2 A$	10 - 30 VDC
